SUMMARY

Product-focused professional with 3+ years experience driving data-driven product initiatives across AI, embedded systems, and cloud solutions. Led cross-functional teams to deliver feature launches that increased efficiency by 40% and reduced incident resolution by 30%. Strong analytical and strategic skills with deep expertise in technical product operations and user-centric research.

WORK EXPERIENCE

AI/Product Intern (M.Tech Industry Internship)

November 2025 – January 2026

Caze Labs Pvt. Ltd

- Analyzed application logs with custom Python tools, translating technical issues into actionable product requirements and prioritizing fixes by user and business impact; reduced average incident response time by 30%.
- Partnered with engineering to define CI/CD pipeline requirements, balancing deployment speed and release quality; improved deployment success rate by 25% through stakeholder alignment.

Application Support Engineer

July 2024 – January 2025

Accenture

- Coordinated with end users and engineering to triage and resolve P1/P2 production incidents, reframing issues into goal-oriented problem statements that enabled agile prioritization; accelerated user issue resolution by 35%.
- Mined Oracle, Tableau, and ERP usage data using SQL/Python to identify root causes and prioritize fixes based on user and business impact, contributing to a 20% reduction in recurring support tickets.

Professional Upskilling — DevOps Certification Program

July 2023 – January 2023

upGrad

Completed a 6-month DevOps program, gaining expertise in CI/CD pipeline design, cloud infrastructure, and automation—skills leveraged to improve product release cycles and reliability in subsequent roles.

Associate Software Engineer, Embedded Systems & ML

May 2022 – May 2023

Harman Connected Services

- Led automation of validation frameworks in Python and C/C++, expanding test coverage for embedded products and increasing release velocity by 20%.
- Owned a full ML-based predictive maintenance pipeline, from data prep to deployment, enabling real-time health monitoring and reducing field failures by 18%.

PROJECTS

Confident Alternatives — ixigo Product Capstone (Academic Case Study)

- Interviewed 20 users to diagnose conversion drop-off in train bookings, identifying the core barrier limiting resolution to 26% within 24 hours.
- Applied RICE scoring to prioritize 15 solutions; designed and built 2 features targeting key user pain points using structured frameworks.
- Developed and launched a live interactive prototype with clear confidence signals and transparent ranking, supporting more informed user decision-making.
- Modeled annual business impact (~Rs38.8 crore incremental revenue), defined North Star and guardrail metrics, and delivered findings in a final 19-slide presentation.

Case Studies — PM Framework Application Portfolio

Live Demo

- Zomato: Mapped an 8-stage funnel, executed cohort analysis, and implemented North Star/ladder metrics for food delivery user retention.
- X (Twitter): Designed a feature roadmap using growth epics and RICE prioritization, aligning efforts to maximize product expansion.
- VitaFit: Developed a PRD and led user experience audit, optimizing checkout flows based on Nielsen heuristics to enhance conversion.
- EdTech Recommendation: Designed multi-persona recommendation PRD with NFRs and trade-off analysis, improving personalization while safeguarding user privacy.

SKILLS

Product Frameworks: AARRR, RICE Prioritization, PRD Writing, Funnel Analysis, Cohort Analysis, North Star Metrics, UX Heuristic Evaluation, Metric Design, Trade-off Analysis

Analytical & Technical: Python, SQL, C++, TensorFlow, Scikit-learn, Data Pipelines

Systems & Tools: Linux, Git, Docker, Jenkins, REST APIs, AWS, GCP, Lovable (Rapid Prototyping)

EDUCATION

M.Tech in Computer Network Technology Ramaiah Institute of Technology	2024 – Present
B.E. in Electronics & Telecommunication Savitribai Phule Pune University	2019 – 2022

CERTIFICATIONS

Product Management with AI (AI-Powered PM Certification) Airtribe	2026
AWS Cloud Practitioner Essentials Amazon Web Services	
Introduction to TensorFlow for AI, ML and Deep Learning Coursera	
Python for Data Science NPTEL	

HONORS & AWARDS

- Projected Rs38.8 crore incremental annual revenue through product feature optimization in academic PM capstone.
- Reduced incident triage time by 40% and deployment failures by 50% by driving process improvements at Accenture and Caze Labs.
- Improved embedded product QA coverage by 40% and enabled 20% reduction in maintenance costs via predictive ML deployment at Harman Connected Services.
- Received positive jury recognition for product strategy and clarity during ixigo capstone presentation.
